SUMMARY

Full Stack Developer experienced in building production-ready web applications using React, Node.js, Express, and MongoDB. Skilled in authentication systems, real-time dashboards, scalable backend APIs, and deploying web applications. Able to own features end-to-end with strong problem-solving and delivery mindset.

SKILLS

Frontend	React, Next.js, Tailwind CSS, Redux Toolkit
Backend	Node.js, Express.js, REST APIs, WebSockets, JWT Auth, Spring Boot, Java
Database	MongoDB, PostgreSQL
DevOps/Deployment	Vercel, Render, Git, GitHub Actions

EXPERIENCE

Technical trainee May 2025 – Sep 2025
Xebo.ai, Noida (Hybrid)

- Delivered 15+ production features including full-stack dashboard using Next.js and Node.js with dynamic data visualizations (Highcharts), role-based access control, and real-time survey modules.
- Developed REST APIs and Firebase Cloud Functions for event scheduling, notifications, and data synchronization.
- Implemented automated report generation using PPTXGenJS, enabling users to export customized PowerPoint presentations directly from dashboard analytics.
- Created admin monitoring panels with advanced filters and Excel/PPT export functionality, improving product adoption and operational efficiency.

PROJECTS

ProfitDouble — AI-Assisted Inventory Sales Management System profitdouble.in

- Built production-ready platform in just 2 weeks using React, Node.js, Express, and MongoDB with JWT-based authentication.
- Integrated Gemini API to enable conversational analytics, allowing users to query business insights through natural language.
- Designed inventory workflows including stock tracking, transaction logging, and low-stock alerts with automated notifications.
- Deployed frontend on Vercel and backend on Render with environment-based configuration and CI/CD pipeline.

iNotebook — Cloud-Synced Notes App inotebookdf.netlify.app

- Developed secure notes application using React and Express with JWT authentication and bcrypt password hashing.
- Built RESTful API with Express middleware for request validation, error handling, and route protection.
- Implemented CRUD operations with input validation and optimistic UI updates for seamless user experience.

Ashprint — Automated Printing Payment System

- Built end-to-end print automation workflow using Next.js and Node.js, reducing manual processing time by 85%.
- Streamlined complete printing process from upload to output in 45-60 seconds with automated file handling.
- Integrated Razorpay payment gateway and developed Raspberry Pi print server with queue management system.

EDUCATION

B.Tech in Computer Science and Engineering
Sharda University, Greater Noida

2025
